A DCF valuation is a valuation method where future cash flows are discounted to present value. The valuation approach is widely used within the investment banking and private equity industry. Read more about the DCF model here (underlying assumptions, framework, literature etc). On this page we will focus on the fun part, the modeling!

In finance, valuation is the process of determining the present value (PV) of an asset. Valuations can be done on assets (for example, investments in marketable securities such as stocks, options, business enterprises, or intangible assets such as patents and trademarks) or on liabilities (e.g., bonds issued by a company). Valuations are needed for many reasons such as investment analysis ...
