Design is the creation of a plan or convention for the construction of an object, system or measurable human interaction. Design has different connotations in different fields (see design disciplines below). In some cases, the direct construction of an object (as in pottery, engineering, management, coding, and graphic design) is also considered to use design thinking.

A Framework for Designing Nursing Knowledge Management Systems 16 Figure 1: Knowledge Management Cycle Knowledge Management Systems Knowledge management systems refer to a class of information systems applied to manage or-

A Framework for Designing Nursing Knowledge Management Systems

Logic Models are a popular tool that can be used to help conceptualize your change effort. It does this by inviting the author(s) to articulate their understanding of the current situation, the changes they hope to bring about through their program effort, with and/or for whom, the activities planned to contribute toward this change, the resources needed to put into the effort, assumptions they ...
