

### **from reliable sources introduction pdf**

One of the key policies of Wikipedia is that all article content has to be verifiable. This means that a reliable source must be able to support the material. All quotations, any material whose verifiability has been challenged or is likely to be challenged and contentious material, whether negative, positive, or neutral, about living persons, must include an inline citation to a source that ...

This page in a nutshell: Ideal sources for biomedical material include literature reviews or systematic reviews in reliable, third-party, published secondary sources (such as reputable medical journals), recognised standard textbooks by experts in a field, or medical guidelines and position statements from national or international expert bodies. Cite reviews, don't write them.
